

Southern Tradition™

Savannah Retaining Wall and Free-standing Wall System

Titanium

Timber

Dublin Blend

Monroe Blend

Distinctive by Design

Retaining walls and free-standing walls are very popular feature elements in today's landscaping design. Southern Tradition™ wall system provides a distressed, natural-stone appearance and long-lasting durability that adds beauty to any landscape project. The "old world" look adds a classic elegance and rich textured appearance that accents outdoor spaces from patios and courtyards to garden edging and dramatic terraces. Southern Tradition represents a value added design feature making it the ideal choice for your next project.

Designing with Southern Tradition™ is the key to a truly successful landscape wall project. Southern Tradition™ offers four distinct colors including blended versions. Its ease of installation allows Southern Tradition to be laid out in numerous pattern options to help create that special look for your outdoor space.

Available Colors:

Site Preparation

Installing a retaining wall or free-standing wall is not done without proper preparation. The integrity of the project rests greatly on how well the base material is installed and other materials are placed. Soil or other base conditions determine what type and how much material is necessary for a solid and sturdy wall. Consult your LEE Brick + Block representative for more information about retaining wall or free-standing wall installation. Proper preparation of the surface to receive the wall units is crucial to the project, and will lengthen the life of your investment.

Benefits of Southern Tradition™ Concrete Pavers

- **Ease of installation - Fully modular**
- **Low maintenance to the wall units**
- **Choice of colors**
- **Can be accented with a variety of post and wall cap types such as Mountain Stone®, Capital Cast Stone™, or a "self-cap" using standard 4"x8"x12" Southern Tradition™ units**
- **Choice of patterns in which the wall units will be laid**
- **Withstands climatic changes and soil shifts**
- **Can be engineered for walls in excess of 36-inches in height**

Southern Tradition™ is manufactured and distributed by LEE Masonry Products, Inc. and its affiliates.
