Thank you for choosing Rosetta hardscape products. The following are some helpful tips to make your first installation go smoothly. For more in-depth technical information, see our Grand Flagstone Installation Guide (available at discoverrosetta.com) or contact Bob Conklin with Rosetta Technical Support at (877) 777-6558 ext 3081.

Your safety is important to us. Please follow OSHA guidelines, and utilize safety-toe boots, hardhats, gloves and eye, ear & respiratory protection whenever appropriate.

**PATTERNS**
- Follow our simple layout patterns to create patios and walkways.

**VIEWING PERSPECTIVE**
- In a patio layout, place Grand Flagstone at a 45 degree angle from the most common viewing perspective. This will eliminate the appearance of long, unbroken seams.

**PALLET ORIENTATION**
- Orientate the pallet in the same direction as your walkway or patio layout. This will ensure the easiest transfer of product from the pallet to the ground.

**PROJECT EFFICIENCY**
- Remove flagstone pieces from the pallet only as needed. This will ensure that the patterns do not get mixed up on the jobsite.

**BLEND MULTIPLE PALLETS**
- In order to achieve the best possible color blend, utilize material from multiple pallets simultaneously (when applicable).

**BORDERS**
- A cut-off saw can be used to create straight or curved borders if desired. (Use proper safety equipment)

**LOAD LIMITS**
- Unlike a typical paver installation, do not run a plate compactor across the surface of Grand Flagstone. Excessive force can crack the flagstone surface. Grand Flagstone is not suitable for vehicular traffic.

**BROKEN PIECES**
- Due to the natural “random” shape of Grand Flagstone, broken pieces can be utilized by simply expanding the broken joint to approximately 3/8”.

*Do not use de-icing salts on Grand Flagstone Pavers. Use of de-icing salts can damage the paver surface and will void the product warranty.

---

**REQUIRED TOOLS**
- PLATE COMPACTOR
- SHOVEL
- RAKE
- LEVEL
- LOW-PROFILE PAVER RESTRAINT

**OPTIONAL TOOLS:**
- CUT-OFF SAW
- DEAD BLOW HAMMER
- SCREED RAILS & SCREED BOARD
- GEOTEXTILE FABRIC

**QUICK INSTALL TIPS**

**LAYERS**

<table>
<thead>
<tr>
<th>LAYER 1</th>
<th>LAYER 2</th>
<th>LAYER 3</th>
<th>LAYER 4</th>
</tr>
</thead>
<tbody>
<tr>
<td>38°</td>
<td>42°</td>
<td>38°</td>
<td>42°</td>
</tr>
</tbody>
</table>

**TYPICAL CROSS-SECTION**

- Grand Flagstone Slabs (1.75" (45 mm) Thick)
- Jointing Sand between Slabs
- Course Bedding Sand (1" (25 mm) Thick)
- Compacted Gravel Base (6" (150 mm) Thick)
- Woven Geotextile (Optional)
- Compacted Existing Sub-Grade

**PATIO LAYOUT ORIENTATION**

- **View**
- Main Walkway

**COMMON POINTS FOR INTERLOCKING LAYERS**

- Properly placed interlocking layers

**PROPERLY PLACED INTERLOCKING LAYERS**

- Long, unbroken lines caused by seam between layers oriented at 45° angle from main view

**WALKWAY LAYOUT**

- Leave jagged edge or trim to provide smooth edge (Optional)
